This Oil Sands Safety Association (OSSA) accredited fall protection course is designed for any worker needing to undertake work at height on any OSSA worksite, and is also recognized as a certified fall protection course on any non-OSSA worksite. Course content is based on current OH&S regulations and outlines additional safety criteria required on any OSSA worksite.

This course includes workbooks and handouts. Upon successful completion of the course, participants will receive a certificate card that is valid for three years.

Course Outline

Pre-requisite: Must be physically fit

Course duration: 1 day (10 hours)

Course highlights include individual and group work on the following:

- Hazard recognition and solutions
- Fall protection systems design, function and limitations
- Equipment inspection criteria on demonstration equipment
- Fall protection work plan
- Harness donning and doffing
- Harness suspension exercise
- Suspension trauma and rescue
