# COMPREHENSIVE TRAINING PROGRAMS

Education and skills training focused on real life scenarios to help create safer work environments

**HAZMASTERS<sup>ED</sup>**  
EDUCATION & SKILLS TRAINING FOR SAFER WORK ENVIRONMENTS

## Building a safety culture through our commitment to education and training!

### Why choose Hazmasters for your training needs?

#### EDUCATION

Comprehensive hands on safety training programs ensure workers are trained and educated for on the job hazards.

#### KNOWLEDGE

Reduce risks and hazards, enhancing your overall workplace safety program with educated staff.

#### ENGAGEMENT

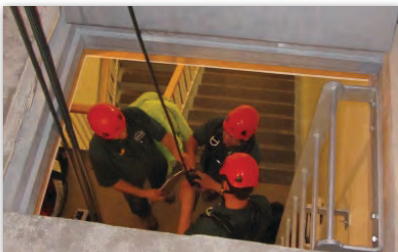

Add value and create safer working attitudes; an educated worker is an invested worker who will make safer choices.

### High quality, hands-on, customized training programs taught by experienced instructors.

- We provide high quality education, utilizing our resources to provide courses when and where you need them
- Programs include on-site, off-site, open enrollment, private classes and customized courses that can be tailored to incorporate your company's procedures and practices
- Our approach to training focuses on real life scenarios specific to industry and environmental challenges, company risks, and building a safety culture in your workplace
- Specific provincial and federal regulations are always part of our courses to ensure regulatory compliance
- Certificates of completion provided to successful attendees passing written tests and evaluations of hands-on skills
- National training programs for consistency throughout the country

### Our facilities

- Comfortable, temperature controlled classrooms
- Practical areas for hands-on demos for safety training
- Easy access to showrooms and branch sales areas for additional product expertise before and after class

- Water Damage Restoration Technician (WRT)
- Applied Microbial Remediation Technician (AMRT)
- Odour Control Technician (OCT)
- Fire & Smoke Damage Restoration Technician (FSRT)
- Carpet Cleaning Technician (CCT)
- Carpet Repair & Reinstallation Technician (RRT)
- Upholstery & Fabric Cleaning Technician (UFT)
- Restorative Media Blasting (RMB)
- Contents Efficiencies & Job Operations
- Trauma Scene Remediation
- Xactimate Basic/Intermediate Estimating

*\*Amenities and course offerings may vary by branch.*

# SAFETY TRAINING

Experienced instructors with over 130 combined years of expertise

## OUR SAFETY TRAINING INSTRUCTORS

### **Ben Brooks, NCSO, CSO, CSS, CSC-GSC**

*Burnaby/Victoria/Kelowna, BC*

- 15 years experience as an Occupational Health & Safety Professional
- Developed over 30 full curriculum courses to date
- Experience in many industries, including General & Industrial Construction, Oil & Gas, Forestry, Marine, Large Demolition, Scrap Metal Recycling, Industrial Coatings
- Developed working at heights procedures, fall protection plans, hazardous materials exposure control plans
- Conducted risk assessments for confined spaces and asbestos, silica and lead abatement

### **Wesley Sim, AME "S", TSC, CSO**

*Burnaby/Victoria/Kelowna, BC*

- 30 years experience as an Occupational Health & Safety Professional
- Experience in the aviation, emergency services and law enforcement industries, developing and instructing many occupational health and safety programs
- Instructed one of the first through confined space programs in North America in the 1980s, including constructed confined space simulators
- Certified Hazmat Technician, developing and instructing hazmat programs and responding to hazmat calls for local fire departments

### **Bruce Waterer**

*Edmonton, AB*

- 20 years experience in safety training, 11 years training in the railroad industry
- 30 years experience in the construction industry, including bridge building, heavy equipment operations and hazmat operations
- Consultant for fall protection and confined space hazard assessments, anchor re-certifications with pull testing and scaffold inspections

### **Calvin Beale, B.Sc**

*Calgary, AB*

- 25 years experience in safety training
- Experience as Lead Safety Hand overseeing safety and rescue on gas plant turnarounds and shutdowns
- Industry experience in electrical installations, building construction and chemical manufacturing
- Co-creator and co-editor on ENFORM's original Rig Work Fall Protection and Rig Work Fall Rescue courses

### **Beverly Drobot, B.A., NCSO**

*Winnipeg, MB*

- 6 years experience in safety training
- Experience in the manufacturing industry and as a safety officer in the construction industry implementing safety programs, including procedures for fall protection, confined space entry, rescue and scaffolding applications
- Member of CSA standard development committees for S269.2 (Access Scaffolding) and Z1006 (Work in Confined Spaces)
- Committee member for the Manitoba Working at Heights and Scaffolding Work Groups to develop provincially approved training and training provider standards

### **Mark Fawley, B.S.A., MAst, CSO**

*Winnipeg, MB*

- 8 years experience in safety training
- Experience in the Canadian Navy and in the construction and maintenance industries developing, and implementing safety programs and procedures for fall protection, confined space entry, rescue and scaffolding applications
- Member of CSA standard development committees for S269.2 (Access Scaffolding) and Z1006 (Work in Confined Spaces)
- Committee member for the Manitoba Working at Heights and Scaffolding Work Groups to develop provincially approved training and training provider standards

### **Jon Paul Rico, CHSC, COHS**

*Ajax/Ottawa, ON*

- 15 years experience in safety training
- Conducted Health and Safety GAP audits for federally and provincially regulated clients
- Conducted WSIB Workwell audits and aided clients in establishing programs which met WSIB Workwell standards
- Provided Confined Space consulting for clients which included assessing and developing entry plans and programs; led ship board emergency response teams
- Member of the Environmental Abatement Council of Ontario

### **André Lalancette, HSP, GMTI**

*Dartmouth, NS*

- 11 years experience in safety training, with a certificate in Adult Education
- Member of the Canadian Armed Forces for 27 years
- Experience as a Mechanical Technologist with comprehensive knowledge in areas that include HSE program development and implementation, safety training design and implementation, CSA codes and standards, mechanical and electrical technology, worksite inspections and hazard identification
- Expertise in Oil & Gas, Ship Yards, Waste Management, Environmental Deconstruction, and Unexploded Ordnance (UXO) Remediation

# IICRC (RESTORATION) TRAINING

Industry experts teaching proven techniques backed by passion and knowledge

## OUR IICRC TRAINING INSTRUCTORS

### Carey Vermuelen • AMRT, WRT, FSRT, OCT, RRT, CCT, UFT

- 34 years experience as a property restoration specialist, industry advocate and consultant
- Expertise in textile cleaning, water damage restoration and mould remediation
- 12 years experience as a certified IICRC instructor
- Has taught the most classes of all IICRC instructors from 2010-2015, averaging over 70 classes per year
- Maintains one of the highest student pass rates amongst IICRC instructors
- Carey's IICRC approved school, Indoor Air Management Canada, focuses on Canadian content, integrating CSA standards and provincial legislation to connect restoration training with safety training; where applicable, classes incorporate confined space entry, fall protection and infection control
- Served 17 years on the IICRC Board of Directors with 5 years as Vice President and 3 years as President, currently on the IICRC Board of Directors
- Contributed to the development of IICRC standards and reference guides for the restoration industry
- Sits on 11 IICRC committees and serves as the Textile Division Chair overseeing 8 Trade Advisory Committees
- As a volunteer member of the IICRC Marketing Committee, Carey has been instrumental in marketing the use of IICRC Certified Firms and Technicians to the insurance industry and different levels of government

### Gabriel Belanger • WRT, FSRT

- 13 years experience as a property restoration specialist
- Expertise in textile cleaning, water damage restoration and mould remediation
- Current Technical Advisor/Trainer for Steamatic Canada
- Bilingual in French and English; conducts IICRC training in Quebec in French
- Facilitator of continuing education credit classes to the insurance industry across Canada for agents and adjusters
- Teaches Indoor Air Management Canada's course curriculums

### James Tole • CCT, UFT, Contents Efficiencies & Job Operations

- 28 years experience as a cleaning and restoration specialist
- Expertise in textile cleaning and contents processing
- Diverse background in chemical engineering technology and is an Emergency Services Expert and Restoration Proficiencies Specialist
- 21 years experience as a certified IICRC instructor
- Developed a full contents processing course in 2010
- Current Training & Education Administrator for Fireline Training Centers

## DID YOU KNOW THAT YOU MAY BE ELIGIBLE FOR A GOVERNMENT GRANT TO COVER TRAINING COSTS?

- The Government of Canada Job Grant helps employers train new or existing employees for jobs that need to be filled
- This flexible program is designed to meet the needs of businesses of all sizes, in all industries and regions
- It offers funding toward the cost of training provided by eligible third-party trainers
- The Government of Canada could provide two-thirds of the cost of training, up to a maximum of \$10,000 per grant.

Learn more by visiting:

[www.esdc.gc.ca/en/job\\_grant/index.page](http://www.esdc.gc.ca/en/job_grant/index.page)

## OPEN ENROLLMENT TRAINING SCHEDULE

Training schedules for both safety and IICRC classes are available on our website.

- Safety: [www.hazmasters.com/safety-training-calendar](http://www.hazmasters.com/safety-training-calendar)
- IICRC: [www.hazmasters.com/iicrc-training-calendar](http://www.hazmasters.com/iicrc-training-calendar)

## NEED CONTINUING EDUCATION CREDITS TO MAINTAIN YOUR IICRC CERTIFICATIONS?

All of our open enrollment safety training classes are IICRC approved as CEC's!

For enquiries on open enrollment or private courses, e-mail us at [safetypays@hazmasters.com](mailto:safetypays@hazmasters.com).

# HAZMASTERS<sup>ED</sup>

EDUCATION & SKILLS TRAINING FOR SAFER WORK ENVIRONMENTS

# EQUIPMENT SERVICE, MAINTENANCE & REPAIR

Technical services, available in-house and on-site, to reduce down time and greatly enhance your productivity

## Why choose Hazmasters for your service requirements?

### COMPLIANCE

Minimize risk and liability by meeting provincial and federal regulations along with internal codes of practice.

### CONVENIENCE

Services are available at your site or by pick up and delivery by our fleet. We service what we sell.

### COST SAVINGS

Reduce downtime, protect your assets and increase productivity by having our trained technicians service your equipment.

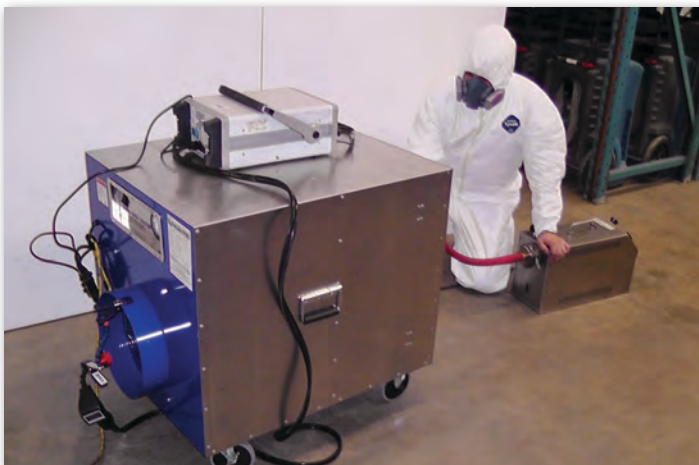

## Hazmasters is a full service solutions provider.

- As important as safety is to your business, it is also important to manage it effectively to maintain high productivity
- Hazmasters offers an integrated set of workplace safety solutions to ensure both maximum safety and efficiency
- Have confidence knowing Hazmasters can provide all the necessary services to go along with the equipment that we sell, making us a comprehensive and convenient one-stop-shop
- Our technicians are factory trained and certified

## Maintenance, Repair, Calibration and Recertification

- Ensure optimal performance and long lasting equipment
- Gas detection calibration, sensor replacement and instrument repair
- Self retracting lifeline recertification, inspection and repair
- Fall protection equipment maintenance; harness fittings
- Dehumidifiers, blowers, negative air machines, HEPA vacuums and hydroxyl/ozone generators trouble shooting and service
- Respiratory equipment service and cleaning
- Level A chemical protective suit pressure testing
- Portable lighting repair
- Ladder inspection

## DOP/PAO Testing of HEPA Filtered Equipment

- We have a comprehensive DOP Technician Certification Program that ensures testing is completed professionally, safely and in accordance with applicable regulations
- Our programs and operations adhere to 6S principles and insurance is in place to cover all facets of the services Hazmasters provides

**What is a DOP/PAO test?** A process that challenges HEPA filtered equipment to ensure it is safe to use in hazardous environments. An aerosol generator is used to convert DOP or PAO oil to an aerosol with particle sizes down to .3 micron. A photometer then measures the amount of particulates in the exhaust air stream.

# EQUIPMENT SERVICE, MAINTENANCE & REPAIR

Technical services, available in-house and on-site, to reduce down time and greatly enhance your productivity

## Respiratory Fit Testing

- Qualitative and quantitative fit tests for respiratory protection are available at our location or at your job site
- For optimal protection, a respirator must fit properly and form a good seal on your face when in use; this is verified through a proper fit test
- Upon successful test completion, fit test record cards are provided listing respirator model and worker identification
- All testing is done in compliance with CSA Standard Z94.4-11

## Equipment Rentals and Leasing

- Rentals and leasing are ideal for addressing budget constraints and short term emergency solutions
- Rental fleets include confined space entry equipment, fall protection equipment, gas detection instruments, tools and measurement instruments, respiratory and ventilation equipment, thermal imaging cameras, HEPA vacuums, drying equipment and air movers/scrubbers
- Need something else? Ask us!
- Daily, weekly and monthly rates are available

*\*Availability of services and rental fleet may vary by branch.*

***Looking for regulatory inspections and equipment tracking?

EQUIPMENT INSPECTIONS FOR SAFER WORK ENVIRONMENTS

# INSPECTION SERVICES

Fully integrated safety asset inspection management system, building a stronger safety culture

**HAZMASTERS ID**  
EQUIPMENT INSPECTIONS FOR SAFER WORK ENVIRONMENTS

## Taking regulatory compliance and workplace safety to a higher level!

### Why use the HazmastersID inspection program?

#### COMPLIANCE

Ensure regulatory compliance and legal due diligence when you have us manage your inspections.

#### EFFICIENCY

Inspection results are documented in our web-based system; reports are available to you 24/7

#### PRODUCTIVITY

Track equipment within a facility, job site and organization; assign equipment to a specific worker

### We inspect and document your equipment, saving you time and money.

Damaged, unsafe equipment is identified by our inspectors and removed from service so workers don't get injured due to wearing faulty equipment

#### ENHANCED INSPECTIONS

- Free up your safety officers' valuable time
- Third party inspections are recommended by manufacturers
- Our inspectors are factory trained and certified competent
- Inspections are completed based on manufacturer recommendations
- New equipment is inspected and tagged prior to purchase
- Inspections performed on-site or at our facility

#### DETAILED DOCUMENTATION

- Detailed and accurate records available online for all inspected assets, including failed items and items needing service
- Updated reports including equipment assignment by job site and individual worker
- Inspection renewal notification to ensure proactive monitoring
- Look for patterns that indicate an alternative product may be more suitable

#### VISUAL CONTROL

- Improved monitoring and identification via the high-visibility tag
- Annual colour coded tagging system for ease of tracking and monitoring
- Easily identify compliance or quality control issues at a distance
- Tags are imprinted with the year and month of inspection and a unique reference number
- Failed items identified with an orange "DANGER DO NOT USE" tag

# SIGN SHOP

Full service sign shop dedicated to helping you find solutions for all your safety and communication needs

## Why choose Hazmasters' Sign Shop?

### SELECTION

Signs are available for every application in a wide variety of materials, sizes and formats.

### CUSTOMIZATION

Personalize your signage with company logos, graphics or your own unique wording.

### HAZARD IDENTIFICATION

Keep workers and visitors safe and stay compliant by identifying hazards with effective signage.

## Identify safety hazards in your workplace

- Hundreds of safety legends and eye catching displays
- Cost effective advertising and notification
- Important information and safety reminders in your workplace are key to creating safer work environments

### Wide Selection of Safety Signs

- Construction signs which can withstand harsh jobsite conditions
- Personal protective equipment (PPE)
- First aid and eyewash
- Electrical and lockout
- Asbestos and much more

### Safety Signage for Every Application

From indoor and outdoor signs to indoor vinyl and window decals, banners, labels, tags and more, we have the expertise to serve you.

If you cannot find the sign you are looking for, we will create a custom sign to meet your needs.

### Customized Signs

Design and personalize your signs:

- Make your safety messages more effective with your own custom wording, colour and graphics.
- Custom signs allow you to communicate workplace hazards or policies in the most effective way.

### Sign Materials

- Adhesive vinyl decals
- Styrene
- Aluminum
- Coroplast
- Magnetic
- Dibond
- Intecel
- Polyblend
- Sandwich boards
- Banners

### Facility Site Survey

Let Hazmasters' safety specialists help you assess your facilities to determine signage requirements. We will identify hazards to ensure safety and compliance in your workplace.

Hazmasters' complimentary "walk through" your facility helps to maintain safety and best practices.

Visit our website to browse safety signage:
