### Americo Twister™ Green Floor Pad

A revolutionary cleaning system consisting of floor pads containing billions of microscopic diamonds which clean and polish the floor mechanically instead of using chemicals. Twister™ can be used on most common floor surfaces such as terrazzo, natural stone, concrete, vinyl and epoxy. Twister™ transforms dull, worn floors into clean, glossy and brightly polished floors. Final Step for the Standard or Intensive method and also for daily maintenance of the floor. This step will effectively maintain a high gloss on the surface when used regularly. Twister™ Green is ideal for use on most floor surfaces such as stone, vinyl and linoleum floors. It works well for high-speed polishing (Twister™ Extreme) of smooth concrete, terrazzo and natural stone surfaces. Twister™ Green is also very effective in maintaining polished vinyl and linoleum floors.

**Elkay TUF-R® Linear Low Density Gusset Bags**

Tuf-R® Linear Low Density Polyethylene (LLDPE) bags provide extra strength and puncture resistance compared to low density bags of the same gauge. Because of this, it's often possible to use a lighter gauge Tuf-R® bag to do the job of a heavier gauge LDPE bag, which saves money and helps to reduce the environmental impact. Tuf-R® bags are made from virgin materials, so they comply with USDA and FDA requirements for use in food applications.

## Grocery Sack

**Crown Poly Hippo Sak™ Grocery Bags**

The invincible grocery bag with the strength of paper and the ease of plastic. 54 Micron Strip makes Hippo Sak's bottom seal over 500 times stronger than regular seals. One (12.5" x 7.5" x 24") Hippo Sak™ can hold the groceries of 3-4 non-reinforced bags. Eliminates time spent on double bagging. Efficient self-opening feature decreases time spent opening each bag.

Reduces plastic bag usage by 35% or more. Reused at home more than any other grocery bag. The only pro-environment and pro-business product for retailers. Material: HMW, HDPE and LLDPE.

## Baking Cups, Holders, & Liner

### Elkay Poly-Nylon Pan Liners

Made from a tough 1 mil Polyethylene and Nylon material that provides a level of protection that can't be matched. Poly Pan Liners make clean up a breeze and save labor costs because they protect oven baking and roasting pans, steam table serving pans, cooking pots, baking sheets and more from cooked-on residue that can requires endless scrubbing. In addition to the savings in labor costs, there's also savings to be realized from reduced wear and tear on pricey pans and equipment. The liner bags are designed to withstand temperatures from +400 degrees F to -70 degrees F, so they can be used for short term food storage as well.

### Elkay Value Plus Poly Pan Liners

Made from an exclusive PTL material that gives great performance at a fraction of the cost of Nylon pan liners. Use to protect oven baking and roasting pans, steam table serving pans and cooking pots and more to make clean up a breeze. Using these popular pan liners is a great way to save on labor/clean up of cooking pans in busy kitchens. They also preserve the life of pans by acting as a physical barrier to sticky and baked-on residue and thus avoiding the repetitive scrubbing that reduces the life of the pan. Designed to withstand temperatures from +400 degrees F to -100 degrees F, so they can be used for short term food storage as well. Gauge: 0.00048.

**Darnel Clean Advantage Hinged Containers**

A Green alternative to traditional take out containers without compromising on functionality. A special additive is used in the manufacturing which breaks down the molecular weight of the plastic allowing the biological process associated with biodegradation to set in. Unlike other degradable materials, Clean Advantage foam products can be recycled. In fact, Darnel recycles large amounts of the material during its production process. Smaller ecological footprint. Sturdy and recyclable. 100% grease proof.

**Dart® Foam Hinged Lid Containers**

Hinged containers available non-perforated or with the PERFormer™ perforated hinge that allows the container's lid to be removed. Stackable. Secure closure. Has high insulation properties to keep hot food hot and cold foods cold. The vented containers come with the Performer perforated hinge. Vent holes on sidewalls of the lid preserve food quality (i.e. crispiness) by allowing steam to escape. These containers feature either a double lock closure or a "knuckle" locking tab intended to prevent accidental openings. When closed, a perimeter seal keeps food secure, reducing leaks. Tabs on base ensure container stay closed when picked up by the lid. Also available in black.

## EMI Yoshi GlimmerWare™ Cutlery

A simple and sophisticated style. Ideal for formal or casual dining. Adds a realistic look to any table setting. Mirrors the illusion of premium flatware. Generously sized making them comparable to European cutlery used in the finest restaurants and hotels. We round our fork tines and the bowls of our spoons are deep and smooth around the edges. Our knife blades are finely serrated to easily cut through most foods. Our handles are balanced to the utensil and the unique arch of our handle feels more natural in the hand. And, our sidewalls are thick and durable which adds strength to every utensil.

#### NOVA® Co-Ex/2-Ply Coreless Can Liners

Two layer film strength. This quality adds significant strength and toughness (dart strength) to the liner and makes zippering (straight-line tear) obsolete. Multi-Directional Film Barrier. Two layers of film complement one another in a way that adds significant strength to the can liner. One layer of film is applied vertically and the other horizontally. The end result is the same as using two can liners for the price of one. This technique is used to hide any flaws that is typical of reprocessed material and allows the user to cut costs by using a thinner material without giving up strength. Nova uses recycled material which comes with an SCS certified label on every case that meets LEEDS certification. Black/Gray.

**Pitt Plastics Interleaved Roll Can Liners**

Our High Density Can Liners provide a unique blend of first grade high molecular weight High Density Polyethylene and LLDPE resins. They are puncture resistant, possess impressive film strength and perform under temperature extremes of -40F to 212F. As an added bonus, the formulation of the high density bag confines odors. High Density liners are USDA and FDA approved for food use.

**H-404813-C** 40 x 48, Heavy Clear 13 mic 250/cs

**Pitt Plastics Mini-Roll Can Liners**

The unique blend of first grade high molecular weight High Density Polyethylene and LLDPE resins is puncture resistant, possesses impressive film strength and performs under temperature extremes of -40°F to 212°F. The high molecular weight of the High Density Polyethylene resin allows us to produce can liners that are approximately one-third the weight of traditional can liners with the same capacity. A lower weight bag of superior strength means less material is being used in production, making the High Density Mini-Roll a good choice when searching for a product sensitive to source reduction responsibility. Perforated for easy dispensing.
