

One Stop Shop

SALISBURY Your complete safety solution.

We have everything you need to meet the NFPA 70E Standard and OSHA 29 1910.269 Regulations. The NFPA 70E Standard and OSHA Regulations have been established to protect workers from electrical shock and arc flash hazards. For example, the NFPA 70E Standard specifies areas in which arc flash protection is required for workers. All personnel within the defined boundaries must wear specified protective equipment, even on circuits as low as 50 volts. The NFPA 70E Standard and OSHA Regulations MUST be met, and Salisbury has made it easy to meet them.

We take your safety seriously.

We have you covered from head to toe.

SALISBURY

Salisbury is the most complete personal protective equipment provider

Salisbury is the most complete personal protective equipment provider to all electrical workers. The need for a comprehensive electrical safety program that's easy to use has never been more critical.

> The NFPA 70E Standard and OSHA Regulations have been established to protect workers from electrical shock and arc flash hazards and to educate workers about the protection needed from these dangers.

> For example, the NFPA 70E Standard specifies areas within which arc flash protection is required for workers involved in the maintenance of energized or potentially energized electrical equipment. All personnel within the defined boundaries must wear specified protective equipment, even on circuits as low as 50 volts.

The NFPA 70E Standard and OSHA Regulations MUST be met, and Salisbury has made it easy to meet them.

To ease the burden of meeting all the necessary safety standards and requirements, we've developed convenient Personal Protective Equipment Kits. All the Arc and Shock Protection PPE Kits meet the safety standards categorized by the Hazard Risk Category for each job.

Salisbury electrical safety products comply with ASTM (American Society for Testing and Materials).

Only Salisbury can provide the complete list of Personal Protective Equipment required to protect workers against electrical hazards as defined by OSHA Regulations and the NFPA 70E Standard for Electrical Safety in the Workplace.

Salisbury is the world leader in the manufacturing of Personal Protective Equipment and live line tools to protect electrical workers from the hazards of their job.

SALISBURY HAS YOU COVERED, FROM HEAD TO TOE.

SALISBURY is a Platinum Level Training Partner

SALISBURY ASSESSMENT SOLUTIONS (SAS)

TRUST THE EXPERTS

The name Salisbury by Honeywell is known worldwide for high quality personal electrical safety equipment and training. Salisbury is pleased to now offer expert assessment services and safety compliance/education solutions to organizations worldwide. Our experts are highly educated, trained, and certified with a long history in the safety community along with numerous professional safety affiliations. Salisbury Assessment Solutions (SAS) provides a wide range of services and can cater the solutions to your needs. SAS is part of Salisbury's ongoing commitment to safety education and service improvement. We are proud to offer our newest service enhancement.

Salisbury Assessment Solutions can ease the burden of meeting all the necessary safety standards and requirements, such as NFPA 70E and OSHA, through the individualized assessment services and training solutions. Let Salisbury Assessment Solutions become part of your company's ongoing compliance and education/training.

SERVICES SAFETY PROGRAM ASSESSMENT:

The safety program assessment provides a baseline for how your safety program is being managed. Assessments are customized to meet individual client needs. Upon completion of the assessment, Salisbury Assessment Solutions (SAS) will provide a full summary and suggest practices to improve your organization's safety program.

NFPA 70E COMPLIANCE:

From beginning to end, SAS assists clients at every step to ensure compliance to NFPA 70E Arc Flash Requirements. Take the fear out of labeling and training requirements by contacting SAS.

ENGINEERING SERVICES:

SAS is uniquely qualified to provide independently positioned engineering services and assessments. With access to a full engineering staff led by a licensed Professional Electrical Engineer, SAS can provide accurate, timely assessments and study findings to help ensure system integrity BEFORE problems arise. Eliminate the disruptions and costs associated with undesirable system operations with Engineering Services from SAS.

SAFETY TRAINING:

There are numerous aspects that make up a world class safety program. However, none of them may be as important as training. SAS provides training options and courses customized to your needs.

WHY DO I NEED SAS?

PROBLEM: Ensuring your workers and your facilities are in compliance can be an overwhelming task. Finding a reputable and trustworthy assessor can be even more overwhelming. These tasks need to be accomplished and you want them done right the first time by someone you can trust.

SOLUTION: Salisbury Assessment Solutions offers expert assessment services and safety compliance/education solutions to organizations worldwide. SAS can ease the burden of meeting all the necessary safety standards and requirements, such as NFPA 70E and OSHA, through the individualized assessment services and training solutions. The staff consists of experts who are highly educated, trained, and certified and have a long history in the safety community along with numerous professional safety affiliations. A wide range of services are available and all solutions are catered to your needs.

RECOMMENDATION: Trust the experts. The name Salisbury by Honeywell is known worldwide for high quality personal electrical safety equipment and training. Let Salisbury Assessment Solutions become part of your company's ongoing compliance and education/training. SAS is part of Salisbury's ongoing commitment to safety education and service improvement. Salisbury by Honeywell can also provide you and your workers with all the equipment necessary to become fully compliant.

TRAINING: ON-SITE SEMINARS

Salisbury by Honeywell's On-Site Seminars develop and enhance employee skills and confidence levels, increasing their qualifications and making them precision technicians. This in turn, increases productivity, decreases downtime, and creates cost savings for the company. Companies that invest in Salisbury's On-Site Seminars provide an opportunity for employees to continue expanding their knowledge base and troubleshooting skills.

FACE, HEAD, & NECK PROTECTION

AS1200 PROTECTIVE FACESHIELD - HRC 2

12 CAL/CM²

NEW REVOLUTIONARY AS1200HAT

Salisbury by Honeywell's NEW revolutionary AS1200HAT is a Weight Balancing Arc Flash Protection Face Shield, that stows in a balanced, compact position, centered over the top of the hard hat when not needed. The AS1200HAT has an ATPV rating of 12cal/cm² and utilizes nanotechnology to provide a more transparent window for improved visibility. The shield/window is designed to be easily replaced without tools. The faceshield unit includes ventilation ribs that allow a natural convection air flow through the top of the face shield. This reduces fogging of the visor, lowers CO2 levels and improves comfort for the user.

AS1200 SERIES

7.5" x 20" viewing area Extra light tint .06" thick Absorbs >99.9% of harmful UV radiation Resistant to fogging Meets current ANSI Z87.1, CSA, and tested to ASTM F2178 specifications

OPTIONAL ACCESSORIES AFLENS ANTI-FOG INNER LENS

- Includes an air spaced design that decreases fogging
- Natural convection air flow design helps minimizes fogging
- Shield meets the ASTM requirements for an Anti-Fog Lens

ASFL FLAME RESISTANT ATTACHABLE TASK LIGHTS

The arc tested ASFL FR task light features a high intensity long lasting white LED lamp with an overall brightness of 7 lumens. From a 24 inch distance, the beam is approximately 6-7 inch in diameter. The high intensity illumination is very useful when working up close. 2 AAA batteries provide 14-15 hours of high brightness. NOTE: The AS1200HAT can hold 2 ASFL task lights. The FLKIT only contains 1 task light and 1 clip.

AS12CLR TRANSPARENT CHIN GUARD

The AS12CLR Transparent Chin Guard dramatically increases the user's peripheral view. The enhanced viewing area increases worker performance and productivity. The highly transparent chin guard allows improved awareness and greater safety.

AS1200FB FULL BRIM PROTECTIVE FACESHIELD - HRC 2

12 CAL/CM^2

NEW FULL BRIM AS1200FB

Salisbury by Honeywell's NEW revolutionary AS1200FB is a weight balancing arc flash protection faceshield that fits ALL full brim hard hats regardless of the manufacturer. The shield easily stows in a balanced, compact position, centered over the top of the full brim hard hat when not needed.

The AS1200FB assembly attaches to the full brim hard hat with an elastomeric band that secures the bracket onto the brim. All parts are dielectric and specifically designed for arc flash protection.

The AS1200FB has an ATPV rating of 12cal/cm² (NFPA 70E HRC 2) and utilizes nanotechnology and an anti-fog coating, to provide a clearer, more transparent window for improved visibility. The faceshield unit includes an upper bracket ventilation feature that allows a natural air flow through the top of the face shield. This reduces fogging of the visor, lowers CO2 levels and improves comfort for the user.

OPTIONAL ACCESSORIES

ASFL FLAME RESISTANT ATTACHABLE TASK LIGHTS

The arc tested ASFL FR task light features a high intensity long lasting white LED lamp with an overall brightness of 7 lumens. From a 24 inch distance, the beam is approximately 6-7 inch in diameter. The high intensity illumination is very useful when working up close. 2 AAA batteries provide 14-15 hours of high brightness. NOTE: The AS1200HAT can hold 2 ASFL task lights. The FLKIT only contains 1 task light and 1 clip.

TRANSPARENT CHIN GUARD

The Transparent Chin Guard dramatically increases the user's peripheral view. The enhanced viewing area increases worker performance and productivity. The highly transparent chin guard allows improved awareness and greater safety.

NEW REVOLUTIONARY AS1200FB

7.5" x 20" viewing area Extra light tint .06" thick Absorbs >99.9% of harmful UV radiation Resistant to fogging Meets current ANSI Z87.1 and tested to ASTM F2178 specifications

Unique Weight Balancing Design Optional Task Light Feature Replaceable Window, NO TOOLS REQUIRED. Fits ALL Full Brim Hard Hats Ventilated Design Adjustable Pivot Tension Can Be Easily Removed from the Hard Hat One Hand Operation

ARC FLASH PROTECTION HOODS - AFHOODS

10 - 28 CAL/CM²

AFHOOD15

14

◄ SALISBURY'S ARC FLASH HOODS (baladava) create 360 degree head and neck protection from arc flash dangers, when used with a AS1000 Series Faceshield/Hard Hat/Chin Cup Unit. Each Arc Flash Hood is made from two layers of rib knit material and has an elastic face opening that maintains its shape and size.

The AFHOOD10 has an ATPV rating of 10 cal/cm². The AFHOOD15 has an ATPV rating of 15 cal/cm². The AFHOOD20 has an ATPV rating of 20 cal/cm². Both the AFHOOD28FF and the AFHOOD28EO have an ATPV rating of 28 cal/cm². All are made from FR materials.

CAUTION: Arc Flash Hoods must be worn in combination with a faceshield in order to comply with the requirements of NFPA 70E and will protect 360° inside the arc flash boundary.

Cat. No.	Description
AFHOOD10	10 cal/cm ² protection
AFHOOD15	15 cal/cm ² protection
AFHOOD20	20 cal/cm ² protection
AFHOOD28FF	28 cal/cm ² protection
AFHOOD28EO	28 cal/cm ² protection, 2-eye hood

AFHOOD28E0

ARC FLASH PROTECTION AS1000HAT & AFHOOD KIT

► THE AS1000HAT & AS1200HAT KITS make your Personal Protective Equipment purchasing even easier. These convenient kits contain an AS1000HAT or AS1200HAT, a 10 cal/cm², 15 cal/cm², or 20 cal/cm² ATPV rated AFH00D, safety glasses and an ASBAG.

The AS1000HAT has an ATPV rating of 10 cal/cm². The lens provides a 7.5" x 20" viewing area with an extra light tint. The AS1200HAT has an ATPV rating of 12 cal/cm².

The SKA kits are an ideal kit to use with PPE programs that exceed 8 cal/cm² or with 8 cal/cm² to 12 cal/cm² ATPV rated coveralls and jackets.

NOTE: Due to AS1000HAT ATPV rating of 10 cal/cm², protection greater than 10 cal/cm² cannot be achieved. Due to AS1200HAT ATPV rating of 12 cal/cm², protection greater than 12 cal/cm² cannot be achieved.

Cat. No.	Description
SKA10	ATPV 10 cal/cm ² Kit 10 cal/cm ² AFHOOD with 10 cal/cm ² AS1000HAT, ANSI rated safety glasses and ASBAG.
SKA10-1200	ATPV 10 cal/cm ² Kit 10 cal/cm ² AFHOOD with 12 cal/cm ² AS1200HAT, ANSI rated safety glasses and ASBAG.
SKA15	ATPV 10 cal/cm ² Kit 15 cal/cm ² AFHOOD with 10 cal/cm ² AS1000HAT, ANSI rated safety glasses and ASBAG.
SKA15-1200	ATPV 12 cal/cm ² Kit 15 cal/cm ² AFHOOD with 12 cal/cm ² AS1200HAT, ANSI rated safety glasses and ASBAG.

SKA20-1200	ATPV 12 cal/cm ² Kit 20 cal/cm ² AFHOOD with 12 cal/cm ² AS1200HAT, ANSI rated safety glasses and ASBAG.

SKA10

IMPORTANT: THE MAXIMUM ARC FLASH PROTECTION OF A KIT IS EQUAL TO THE LOWEST CAL/CM² RATING OF ANY COMPONENT IN THE SELECTED SAFETY KIT.

COMPACT PRO-AIR™ ACAIR2000®

ARC FLASH PROTECTION HOOD COMPACT POWERED AIR SYSTEM

Use this unit with Salisbury Arc Flash Protective PRO-HOODs.

◄ SALISBURY'S PRO-AIR ACAIR2000 - NEW UPGRADED CIRCUIT BOARD

AND BATTERY Salisbury's PRO-AIR ACAIR2000 system is designed to blow forced ambient air through a single intake hose, providing fresh oxygen to the worker and reducing the hazardous effects of shield fogging. The unit is microprocessor controlled and operates automatically by blowing air continuously for over three hours on one charge. On the back of the unit is a button that pauses the continuous flow, if needed. Use this unit with Salisbury's PRO-HOOD® and PRO-WEAR® arc flash protection clothing.

The PRO-AIR ACAIR2000 compact powered air system easily mounts to most standard hardhats and functions in one lightweight (less than 10 oz.) easy to use unit. The unit cools the worker and reduces fatigue while wearing a Salisbury Arc Flash PRO-HOOD.

The PRO-AIR ACAIR2000 includes a lightweight blower assembly, universal band, bendable intake hose, Ni-MH rechargeable batteries, and an AC wall charger.

AIR FLOW HOOD SYSTEM & COMPACT PRO-AIR™ ACAIR102

ARC FLASH PROTECTION HOOD COMPACT POWERED AIR SYSTEMS

► NEW SALISBURY PRO-AIRTM AIR FLOW HOOD SYSTEM Salisbury's NEW PRO-AIR, Air Flow Hood System is integrated with Salisbury's PRO-HOOD® Arc Flash Protection Hood. Now, all Salisbury PRO-HOOD Arc Flash Protection Hoods are available with an optional integrated cooling system. This newest addition to the PRO-AIR line of products provides additional air flow and cools the worker. This unit is excellent in warm conditions or confined spaces. The easy to wear system is lightweight, compact, and easy to use. The system is designed to provide the worker with approximately 80cfm of air flow throughout the breathing zone. The unit is powered by 8 AA batteries and is designed to maintain a useful continuous life of up to 35hrs at 80cfm. The unit is non-filtered and is not considered a respirator.

Cat. No.	Description

QUICK REFERENCE CHARTS & INFORMATION

THE SALISBURY ADVANTAGE

ABOUT CE CERTIFICATION

CE Marking on a product:

CE MARKING

All Salisbury PRO-WEAR® Arc FLash Protection Clothing has received the coveted CE certification. This Salisbury advantage is one more reason why Salisbury provides the best personal protective equipment available today. All Salisbury PRO-HOOD® Arc Flash Protection Hoods have also been CE certified. Look for the CE marking to see exactly which garments have been CE 0120 certified.

Nomex® is a registered trademark of DuPont or its affiliates.

SALISBURY'S HI-VIS VEST has an ATPV rating of 5 cal/cm² and is constructed from a flame retardant mesh fabric and provides cool comfort. The vest's fabric has a 40 Xexon Rating, which is the highest visibility available. No other fabric beats it! The vest is available in hi-vis orange or hi-vis yellow. A 2" silver flame resistant 3M[™] Scotchlite[™] reflective material trim is sewn over each shoulder and around the entire garment. The vest is available in Class 2 ANSI standard compliant or CSA standard compliant. Meets ASTM F1506 and ANSI/SEA 107-2010.

WORK GLOVES

THE NEXT-GENERATION OF PERFORMANCE WORK GLOVES.

These high quality performance Work Gloves are constructed of a synthetic and natural material blend. These gloves are highly durable and comfortably form-fit to the hand without inhibiting dexterity.

EXTENSIVE REINFORCEMENT: Salisbury by Honeywell Work Gloves have extensive palm and finger coverage. The PVC based Asphalt Reinforcement Material is tackey, making the gloves more dexterous, durable, and provides a secure grip even in wet conditions.

CUFF: Some of these gloves feature a FlexMesh™ cuff which is a protective, breathable, and comfortable cuff closing system that does not require constant adjusting.

THUMB CUT: The unique 3-D palm construction design prevents bunching between the thumb and index finger.

STREAMLINED KNUCKLE PROTECTION: The knuckle protection on the back of the hand is internalized and will NOT get "caught up" when reaching into a tool pouch or pocket.

DURABLE SYNTHETIC LEATHER ON BASE OF PALM: The base layer is synthetic suede called SupraTex[™]. This material is highly breathable and durable. The material wicks away heat and moisture which prevents sweat and heat from building up.

WORK GLOVES

Not Cut Proof, Puncture Proof or Fire Retardant. Do NOT Expose Near Open Flames, Sparks or Arc Zones.

◀ UWG-KLG - KEVLAR® UTILITY GLOVE - CUT RESISTANT - ALL PURPOSE

This all-purpose work glove is highly cut-resistant and features a 100% KEVLAR[®] lining. This glove has great dexterity and durability.

◄ UWG-SPP - PADDED PALM - ABRASION RESISTANT - HD PURPOSE

This all-purpose work glove is built for a wide variety of Heavy Duty work functions. The glove features 3mm Memory Foam sewn in strategic locations under double-stitched non-slip reinforcement on the palm to resist abrasion and provide good grip in various conditions.

◄ UWG-GPU - UTILITY PLUS GLOVE - ABRASION RESISTANT - ALL PURPOSE

This glove features Asphalt reinforcement on the palm to resist abrasion. The top of the hand is made out of a stretchable, light weight, and breathable reinforced nylon for comfort. The glove also features internal knuckle protection.

◀ UWG-HVO - HIGH VISIBILITY - ALL PURPOSE

This all-purpose work glove is built for High Visibility and a wide variety of work functions. The glove features 3M™ Scotchlite™ on the top of hand and palmside cuff. The top of hand is made out of a stretchable Nylon for comfort.

◀ UWG-GLP - ABRASION RESISTANT - ALL PURPOSE

This all-purpose work glove is built for high abrasive tasks where dexterity and tactility is important. The glove features a one-piece goat skin palm. The top of hand is made with a stretchable Nylon for comfort.

◀ UWG-SDG - DEXTERITY - ALL PURPOSE

This all-purpose work glove is built for a wide variety of work functions that are generally lesser abrasive, but require more tactility. The glove features double-stitched synthetic leather reinforcement in strategic locations that offer greater durability, but does not sacrifice dexterity. The top of hand is made out of a stretchable nylon for comfort.

◀ UWG-HUXT - PRO UTILITY GLOVE - MAX ABRASION RESISTANT - ALL PURPOSE

This all-purpose work glove has maximum abrasion resistance, good dexterity, and breathability. The top of the hand features stretch nylon and the extended cuff includes Asphalt reinforcement on the palm side.

◀ UWG-WPSC - WATERPROOF PRO UTILITY GLOVE - WINTER - ALL PURPOSE

This all-purpose waterproof/breathable work glove is designed for cooler weather. It features stretch nylon on the top of the hand and an extended FlexMesh™ cuff. The inner liner is made with a warm Microfleece. The glove is entirely waterproof, windproof, and breathable. The palm features a SupraTex™ base layer with a durable Asphalt palm reinforcement.

◀ UWG-WPGC - WATERPROOF WINTER UTILITY GLOVE - GAUNTLET STYLE

This work glove is a warm and durable glove. This glove is 100% waterproof, windproof, and breathable. It features a Sportwool™ liner that allows the hand to remain comfortable for long periods of time in extreme weather conditions. 3M Thinsulate Insulation lines the top of the hand, fingers, and cuff.

All gloves are available in sizes S-XXL.

THE ULTIMATE BACK PACK

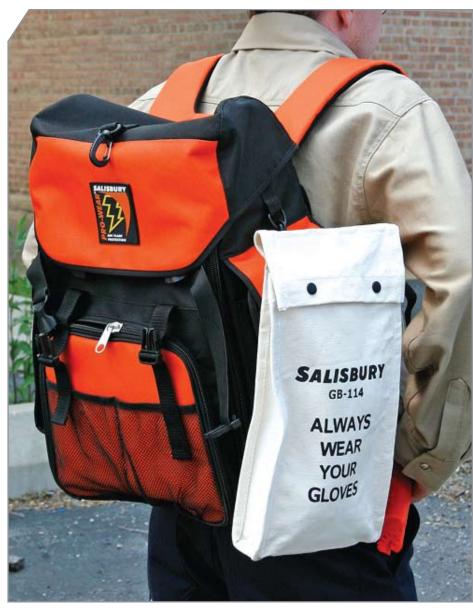

► EVERYTHING YOU NEED IN ONE CONVENIENT LIGHTWEIGHT BACKPACK. The SALISBURY SKBACKPACK is specifically designed to hold virtually everything from tools to full Personal Protective Equipment (PPE) kits. Specialized reinforced compartments with flap dosures are located on both sides of the pack and include flexible slots designed specifically to keep your hand tools in place. The individual compartments make finding the right tool a snap. The backpack can even be personalized to hold your very own PPE kit - dothing, head and face protection, insulated tool kit, and much more. The interior includes extra large compartments to hold voltage detectors or other specialized tools, as well as numerous smaller partitions. There is even a specific area for first aid items.

The rugged SK BACKPACK is manufactured from water resistant reinforced fabric, which is resistant to cuts and abrasion. The adjustable heavy duty straps are wide and padded making it very comfortable to wear regardless of the load. The SK BACKPACK includes an exterior hard hat strap, D-ring's, and universal snap hook. Even a built-in integrated handle for those on the move.

Thank you to numerous lineman and electricians that provided feedback and guidance to Salisbury during the design process.

HEAVY DUTY TOOL BAG & STORAGE BAG

◄ SALISBURY'S HEAVY DUTY TOOL BAG HELPS KEEP ALL YOUR SAFETY NEEDS ORGANIZED AND IN ONE PLACE.

The SALISBURY TOOL BAG is designed to easily transport and organize numerous hand tools and specialized equipment. Finding the right tool becomes effortless because of the many unique compartments. Large reinforced pockets are located throughout the interior of the bag. Outside there are nine individual pouches, including three expandable mesh compartments with "D"-ring clips. Great for carrying anything from water bottles to additional tools.

The SK Tool Bag has a black sleek design and is manufactured from heavy duty water resistant fabric, which is slash and cut resistant. The bag opening is large and reinforced with metal framing. Non-locking hinges allow for easy access and visual searching. The adjustable shoulder strap and durable carrying handle makes toting this lightweight (3.5 pounds) bag from job to job trouble-free.

Salisbury, continuing to exceed industry standards.

PERSONAL ELECTRICAL SHOCK PROTECTION & ACCESSORIES

THE SALISBURY ADVANTAGE

LEADING MANUFACTURER OF INSULATING RUBBER GLOVES

INSULATING RUBBER GLOVES ARE AMONG THE MOST IMPORTANT ARTICLES OF PERSONAL PROTECTION FOR ELECTRICAL WORKERS. Combining high dielectric and physical strength, flexibility and durability, Salisbury insulating rubber gloves have earned the reputation for superior performancemeeting and exceeding the requirements of current ASTM D120 specifications and NFPA 70E standards.

SALISBURY OFFERS THE MOST COMPLETE SELECTION OF GLOVES IN THE WORLD.

Salisbury recommends an alternating glove color program to assure all gloves are in the proper test cycle per OSHA and ASTM requirements. This program creates a visual reminder of the test cycle period by using one glove color for the first test period and a different color for the following test period. Continue alternating these two colors when a new test period begins. For example: Red Class 00 gloves are worn for first test cycle period, then black Class 00 gloves are worn during the second test cycle period.

We take your safety seriously.

EFFECTS OF ELECTRICAL SHOCK

Current	Effects	
1-3Milliamps	Tingling Sensation	
3+Milliamps	Shock (pain)	
10+Milliamps	Muscular Contractions (can't let go)	
30+Milliamps	Respiratory Paralysis (may be fatal)	
60+Milliamps	Ventricular Fibrillation (usually fatal)	
4+Amps	Heart Paralysis (fatal)	
5+Amps	Tissue Burning (fatal, vital organs destroyed)	

ARE YOU NOT SURE WHAT GLOVES YOU NEED?

Salisbury has made it easy with the Salisbury Glove Configurator

Glove Configurator™

Visit www.salisburybyhoneywell.com to use Salisbury's exclusive Glove Configurator™. This interactive web tool allows you to easily determine which Salisbury

gloves you need to meet your requirements.

INSULATING RUBBER GLOVES

SALISBURY INSULATING RUBBER GLOVES are available in sizes 7 ◀ through 12, including half sizes. Proper fit is important to minimize chafing and fatigue. To determine glove size, measure the circumference around the palm. Allow for additional room if fabric glove liners are to be worn, especially with thermal liners.

Class 00 are available in red and black, Type I Natural Rubber or blue and contrasting blue/orange Type II Salcor® ozone resistant rubber. Class O gloves are available in red, yellow and black, Type I Natural Rubber or blue Type II Salcor® ozone resistant rubber. The contrast between the thin outer orange color against the inner blue color makes inspecting for cuts and tears easier when the glove is inflated or stretched.

Class 2 glove are available in Type I Natural Rubber only. All insulating rubber gloves are extremely flexible and make working with small parts easy. The gloves meet or exceed ASTM D120 and IEC EN60903 Standards.

✓ LEATHER PROTECTOR GLOVES should always be worn over Insulating Rubber Gloves to provide the needed mechanical protection against cuts, abrasions and punctures. The ILP Series is manufactured from top grain cowhide or goatskin. Cowhide cuffs are tough leather on palm side and orange vinyl on the back, while the goatskin cuffs are green leather on palm side and orange vinyl on back. The ILP10 gloves do not have a cuff. Full complement of styles from low-volt through 16" contour cuff. Comes in dual sizes 7/7.5 through 11/11.5 and 12. Protectors for Class 00 and 0 are available with non-metallic buckle and pull strap or elastic wrist.

It is the responsibility of the purchaser to specify the overall length of the protector gloves. The Clearance Table shows the minimum distance which shall be allowed between the top of the protector glove cuff and the top end of the bead of the rubber glove per ASTM F496 Specifications.

WARNING: Do not use leather protectors alone for protection against electric shock. Serious injury or death will result. Always use proper insulating rubber gloves.

Proper care of leather protectors is essential to user safety. Inspect the leather protectors when inspecting rubber gloves. Metal particles, imbedded wire, abrasive materials or any substance that could physically damage the rubber gloves must be removed from the protector before use.

◄ LINER GLOVES reduce the discomfort of wearing Insulating Rubber Gloves in all seasons. For year round use, liners provide warmth in cold weather, while they absorb perspiration in the warm months. Many styles and fabrics are available with either a open or knit wrist.

The knit wrist style grips the wrist rather than allowing the cuff to roll down and bunch at the palm. All Liner Gloves are for year round use with Insulating Rubber Gloves and Mittens. All liners are made from stretch fabric that can fit any hand size.

The L Series has a tough outer cotton fabric while the inner lining is soft and comfortable. The LMKC Series is light, airy and allows ease of movement. The LMKW Series is made from a Rag Wool fabric that moves easily yet gives a substantial layer of lining.

INSULATING GLOVES AND PROTECTORS KITS

SHOCK PROTECTION

◄ GLOVE KITS

Salisbury's insulating rubber gloves are necessary for every electrical worker's complete safety. And to insure your safety, Salisbury's leather protectors provide needed protection from cuts, abrasions, and punctures. To keep these safety items in top condition, proper storage is very important.

Proper storage extends the service life of gloves. Folds and creases strain natural rubber and cause it to cut from ozone prematurely. By storing rubber gloves in the right size bag and never forcing more than one pair into each bag, equipment will lie flat and last longer.

EXCLUSIVELY AVAILABLE FROM SALISBURY.

Note: If you require test date stamping, please specify when ordering.

PRODUCT NUMBERING CHART FOR GLOVE KITS

PRO-WEAR® ARC FLASH GLOVES

 $12 - 100 \text{ CAL/CM}^2$

◄ SALISBURY PRO-WEAR[®] ARC FLASH GLOVES are available in ATPV ratings of 12 to 100 cal/cm^{2*}. These gloves are sewn with Nomex[®] thread. All are made with FR material.

All Arc Flash Gloves are 14" long and designed in a clute cut style. One size fits most.

Cat. No.	Description	
AFG11	12 cal/cm², navy blue,	
AFG20	20 cal/cm², navy blue	
AFG31	31 cal/cm², royal blue	
AFG40	40 cal/cm², gray	
AFG55*	55 cal/cm², gray	
AFG100*	100 cal/cm², khaki	

If You Need it, Request it. Call customer service if you need something not seen here.

CAUTION: ARC FLA

AFG20

CAUTION: ARC FLASH GLOVES DO NOT PROVIDE ELECTRICAL PROTECTION. DO NOT USE WHEN INSULATING RUBBER GLOVES (V RATED GLOVES) ARE REQUIRED. *IMPORTANT: NFPA 70E does not have a Hazard Risk Category above 40 cal/cm². Working on levels above 40 cal/cm² should be avoided because of the blast hazards caused by arc flash.

GLOVE BAGS, GLOVE INFLATOR, AND DIELECTRIC FOOTWEAR

SHOCK PROTECTION

► GLOVE BAGS

Salisbury bags are constructed of heavy duty canvas duck and are double stitched at stress points for extra durability. Canvas bags feature a snap hook for hanging on work belts. Bags feature tapered gussets with wide opening tops for easy insertion.

PRODUCT NUMBERING CHART FOR GLOVE BAGS

► GLOVE INFLATOR

Electrical insulating gloves must be inspected before each use. Inspection is simplified by using a portable glove inflator such as the Salisbury G99 and the G100 with adapter for Class 00 and 0 and smaller size gloves. Patent Pending. The G99 is a simple, easy to use, portable glove inflator. The G99 provides a quality means of inspecting gloves in the field. The glove is secured to the inflator using a nylon strap and fastened with hook and pile, or a rubber "0" ring. Inflation is accomplished by pumping the bellows of the inflator.

ASTM DIELECTRIC FOOTWEAR - 100% TESTED TO 20KV

Salisbury's ASTM dielectric footwear is 100% waterproof and made from premium grade ozone resistant rubber. The flexible hand-layered construction includes a durable nylon lining for easy on/off. The sole has a durable construction with a non-skid bar tread outsole. The attached buckle and hardware is nonmetallic. All of Salisbury's ASTM Dielectric Footwear conforms with ASTM F1117 and is 100% TESTED to the electrical hazard requirements of ASTM F1116 at 20,000 volts.

IMPROVED OVERSHOES Salisbury's offers improved 51511 non-buckle overshoe and 51512 2-buckle overshoe. The improved overshoes include a bob sole with aggressive tread for better traction. The deep heel and improved arch are specially designed for climbing ladders comfortably. The wider opening allows for easier on/off.

DIELECTRIC FOOTWEAR - TESTED TO ASTM F1116 AT 20KV

51512	Bob Sole - 2-Buckle Overshoe	Whole Sizes 7 - 16

ARC PROTECTION BLANKETS AND SWITCHBOARD MATTING

MEETS NEW ASTM F2676 STANDARD

WARNING: Because of the unpredictability of electrical Arcs, the Arc Protective Blanket (APB) may not totally contain the arc and flashes, but only reduce or limit explosive and incendiary effects. Properly installed APB's can reduce the risk of injury from the blast and heat, however they do not provide any personal protection for but not limited to Hearing, Eyes, Smoke/ Hazardous gases inhalation and Burns.

WARNING: Arc Protective Blankets are not designed for electrical insulating protection. Using the Arc Protective Blanket for electrical insulating protection can result in serious injury or death.

◄ ARC PROTECTION BLANKET

Salisbury by Honeywell Arc Protection Blankets are now available in 4' x 5' and 4' x 8' sizes. Each size is available in 15kA or 40kA ratings. The 15kA blankets include convenient loops and the 40kA blankets include grommets to easily keep the blanket in place. These new blankets are sold individually or with a storage bag or storage bag and tie-strap kit.

The Arc Protection Blanket is used as a barrier for protection from the explosive and incendiary effects of electrical arcs and flashes. These hazardous electrical discharges can be caused by faults in cables, in cable splices and joints, and at transformer terminals, or they may be generated by the operation of switch gear, circuit breakers and lightning arrestors. The blanket can be used for worker protection in underground vaults, switchyards, and other locations where electrical equipment poses a risk of exposure to explosive electrical discharges. MEETS NEW ASTM F2676 STANDARD.

NOTE: These products do not eliminate or reduce requirements for proper PPE for arc flash protection

SWITCHBOARD MATTING

Switchboard Matting is placed permanently in front of switchgear, motor control centers and other high voltage apparatus to provide an additional level of protection for electrical workers. Made from high quality Type II material, 1/4" (6.4mm) thick and tested to 20kV to comply with ASTM D178, Class 2 specifications. The corrugated surface acts as a safety tread while reducing the possibility of metal particles becoming embedded. Class 2, switchboard matting is made in 25 yard rolls which can be custom cut to specified lengths as per customer request. Class 4 is sold in full rolls only. Class 2 Maximum Use Voltage: 17,000 VAC Class 4 Maximum Use Voltage: 36,000 VAC

LO-VOLT BLANKETS AND ACCESSORIES

SHOCK PROTECTION

ROLL BLANKETS

Salisbury has gone to great lengths to protect workers from lo-voltage electrical hazards by now offering insulating blanket material on a roll. Salisbury's insulating Roll Blankets, made from a high strength fabric reinforced Type II rubber, allow workers to custom-cut blankets to fit each application at the job site. This minimizes the number of different lo-voltage blanket sizes and shapes that would otherwise need to be carried from job to job.

All classes of Roll Blankets are easy to cut, and flexible to -40 F. Highly puncture and tear resistant, each class of blanket is also flame (self-extinguishing), oil, and ozone resistant. Each comes in a convenient 36" wide roll, 30 feet in length in unique colors making it easy to identify and highly visible in the work area.

CLEAR PVC ROLL BLANKETS

Salisbury's Roll Blanket line includes a Class I dear PVC material that permits complete visibility, yet provides the necessary insulating properties meeting ASTM F1742 standards. ROLL BLANKETS

INSULATED RESCUE HOOK AND STATIC DISCHARGE STICK

SHOCK PROTECTION

46

INSULATED RESCUE HOOK

Salisbury's Insulated Rescue Hook is an invaluable tool for any workplace. It's used to withdraw an injured worker out of a hazardous area. Confined spaces, in vaults, or just near electrical cabinets and switch gear are some of the places where this tool is a must. Featuring a foam filled, fiberglass reinforced handle for superior electrical insulation and a coated heat treated body hook with an 18" opening. The stick is available in the standard lengths of 6 and 8 feet. Other lengths are available as a special order. Contact us with your requirements.

INSULATED RESCUE HOOK

Cat. No.	Dimensions ft. (m)	Weight Ibs. (kgs)

24403	8' (2.4) length	5.5 (2.5)	

STATIC DISCHARGE STICK

The Static Discharge Stick is designed to safely remove the static charge after deenergizing. This tool is pre-assembled and includes a brass alloy "U" hook, dosed cell foam filled tubular fiberglass switch stick made in accordance with ASTM Standard F711. 6 feet of copper grounding cable attached to a Salisbury 1814 flat jaw grade 3 bronze serrated clamp with strain relief.

STATIC DISCHARGE STICK

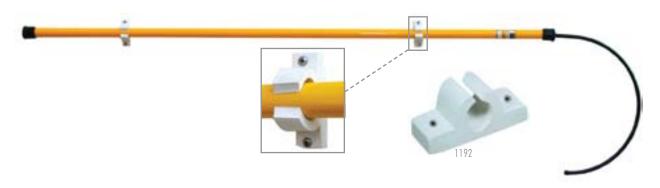

Cat. No.	Cable Length ft. (m)	Description	Weight Ibs. (kgs)
20817	6 (1.8)	Static Discharge Stick 4' (1.2m) length	8 (3.6)
22629	6 (1.8)	Static Discharge Stick w/ Universal Attachment 1' (0.3m) length	.38(0.17)

▼ TOOL HOLDER

SALCOR® Tool Holders secure tools to trailers, compartments and tool rooms. Great for holding rescue hooks and static discharge sticks. 12 per package.

TOOL HOLDER

Cat. No.	Description	Weight Ibs. (kgs)
1192	1.25 (32mm) I.D. Tool Holder	3.5 (1.6)

CLAMPSTICKS AND SWITCH STICKS

SHOCK PROTECTION

► EXTERNAL ROD CLAMPSTICKS

Tough Thermoplastic head ferrule. Wide opening 15/16" (23.8mm) Heavy rubber end cap. EZ Grip plastic hand grip. Stainless steel hook.

External Rod Clampsticks are constructed of closed cell foam-filled tubular fiberglass in accordance with ASTM standard F711. The hook operating rod, made of solid 3/8" (9.5mm) dia. fiberglass, is mounted on the exterior of the tool so that it can be easily wiped down prior to use.

EXTERNAL ROD CLAMPSTICKS

Cat. No.	Length	Length V		ea.
	Feet	Meters	lbs.	kgs
4007	4' 8"	1.32	4.2	1.9
4008	5′ 8″	1.62	4.6	2.1
4009	6' 8"	1.93	5.2	2.4
4010	8' 8"	2.54	6.2	2.8
4011	10' 8"	3.15	7.0	3.2
4012	12′ 8″	3.76	7.7	3.5
4013	14' 8"	4.37	9.4	4.3

Add suffix "S" for a 9864 Switch Stick Head or a "U" for a 9840 Splined Universal Head. Clamp sticks may be ordered with these fittings attached to the butt by adding the appropriate suffix to the catalog number.

► UNIVERSAL SWITCH STICKS

These hot sticks have a standard splined universal head. $1.25^{\prime\prime}$ dia. switch sticks are supplied with a #9971 Prong.

UNIVERSAL SWITCH STICKS

GROUNDING CABLES

SHOCK PROTECTION

SALISBURY GROUNDING CABLES

Grounding Cables are made with extra flexible strand of soft drawn #30 AWG (.01") copper and are available in three different jackets.

The yellow thermoplastic elastomer jacketed cable is the standard for grounding service. It provides a combination of economy, flexibility, and durability. The service temperature ranges from 200° to -50°F. ASTM F 855 Type I.

The black thermoplastic elastomer jacketed cable has a smaller diameter and thinner jacket material giving it better flexibility than the yellow cable. The service temperature ranges from 200° to -50°F. ASTM F 855 Type I.

The transparent flexible thermoplastic (PVC) jacketed cable allows easy inspection for strand breakage. The flexibility decreases with low temperatures. The minimum recommended service temperature is 0°F. ASTM F 855 Type III.

Cat No.	Size	Strand Dia. in. (mm)	Jacket in. (mm)	Short Circuit AMPS, RN		Continuous Current	Wt./1000ft. Ibs. (kgs)

CALICDURY CROUNDING CARLES

GROUNDING CONFIGURATOR™ AND BALL & SOCKET GROUNDING SYSTEM

SHOCK PROTECTION

BALL & SOCKET SYSTEM

The Ball and Socket Grounding System allows for variable angle accessibility. This system is compact and lightweight. The 21190 Socket Clamp is made from bronze alloy with an integral cable support and strain relief sleeve. This is the ideal grounding system for industrial and substation environments.

Other clamps are available. Please contact your local Salisbury representative for more information.

► SALISBURY GROUNDING CONFIGURATOR™

Salisbury's Grounding Configurator[™] makes specifying grounding equipment simple and easy. This interactive web tool allows you to easily build the proper temporary grounding equipment for your specific needs. The step by step process takes out the guess work, and makes it easy to change components until the most appropriate ground set is developed.

Just go to our web site and give it a try. You will be prompted from start to finish. All you need to know is the maximum fault current and the duration of the fault and the configurator will do the rest. No more second guessing quantities or parts to be sure that you have put together a ground set that will function just as you expect. When you finish, enter your personal information and the configurator will instantly provide you with the bill of materials including part numbers. All that's left to do is to place the order!

Visit salisburybyhoneywell.com to use Salisbury's exclusive Grounding Configurator™.

VOLTAGE DETECTORS, GENERAL CLEANERS & GLOVE DUST

SHOCK PROTECTION

SELF TESTING VOLTAGE DETECTOR KITS

Salisbury's Self-Testing Voltage Detectors allow testing to be continuous and automatic. An intermittent flash and beep confirms the detector is functioning properly.

Self-Testing Voltage Detectors are used to verify live or de-energized conductors. These testers may be used with insulating rubber gloves or hot sticks using the splined universal end fitting. Testers indicate voltage with an extra bright LED light and a distinctive audible signal. It is recommended that the tester be moved closer to the conductor until a warning is indicated, or it touches the conductor, apparatus, or test point. Each tester includes three "C" batteries.

The need for additional PPE can be minimized by confirming that there is no electrical hazard present before work is performed. This can be determined by using a Salisbury Voltage Detector attached to a insulating hot stick of a length long enough to keep the worker outside of the arc flash boundary.

Because the Salisbury Voltage Detector alarms in the proximity of electric fields, it is not necessary to make physical contact with the equipment being checked. Because it is made of non-conductive materials, it will not conduct electricity and not cause an arc flash even if contact with energized equipment is made.

SELF TESTING VOLTAGE DETECTOR KITS

Cat. No.	Settings
4556	1-4544 Tester 240V to 230kV, 1-21517 Case, 1-2500 Shotgun Adapter

◄ RUB-OUT[®] HAND CLEANER & TOWELETTES

RUB-OUT[®] is a non-petroleum-based hand cleaner. Dissolves and removes grease, oil, ink, tar, pipe dope, creosote, paint and more without harming rubber or SALCOR® products. Cleans with or without water. Contains natural skin conditioners and leaves a fresh citrus scent. Salisbury's RUB-OUT® Towelettes work fast to loosen, dissolve, and absorb dirt and grease.

Our powerful yet safe cleaning agents work together with an absorbent, nonscratching abrasive cleaning towel. The result is hands that are clean, with a pleasant fragrance. And after cleaning your hands there is enough absorbency to clean your tools and other surfaces with the same towel. These shop size durable towels quickly remove tough-to-clean substances including lubricants, tar, oils, wax, caulk and much more. Put Salisbury degreasing strength to work for you.

RUB-OUT[®] HAND CLEANER & TOWELETTES

Cat. No.	Description	Weight

IMPORTANT SAFETY INFORMATION FOR PPE

ARC PROTECTION CLOTHING REQUIREMENTS OSHA 29 CFR 1910.269 (1)(6)(iii) "The employer shall ensure that each employee who is exposed to the hazards of flames or electric arcs does not wear clothing that, when exposed to flames or electric arcs, could increase the extent of injury that would be sustained by the employee."

Clothing made from acetate, nylon, polyester, acrylic, polyethylene and rayon, in either pure or blended forms, should not be worn when working in hazardous environments.

Clothing made from 100% cotton or wool must be determined acceptable for the conditions the worker will be exposed to. Clothing made from flame-resistant materials, that meet current ASTM F1506, is acceptable.

ASTM F1506 details the specifications of a textile to be used by an electrical worker as a means of electrical arc protection. A garment must include a label, which states the following information: Tracking I.D. Code, Meets ASTM F1506, Manufacturer's name, Care Instructions & Fiber Content, Size, and "Arc Rating" - ATPV or E_{BT} .

ASTM F2178 is the test method used to measure arc rated products intended to protect the face of workers exposed to electrical arcs.

DANGERS OF ARC FLASH

Even relatively low voltages can be fatal. For example, electrical shocks produced from common 60 hz AC power passing from hand to foot for a duration of one second can have the following effects:

EFFECTS OF ELECTRICAL SHOCK

Current	Effects
1-3Milliamps	Tingling Sensation
3+Milliamps	Shock (pain)
10+Milliamps	Muscular Contractions (can't let go)
30+Milliamps	Respiratory Paralysis (may be fatal)
60+Milliamps	Ventricular Fibrillation (usually fatal)
4+Amps	Heart Paralysis (fatal)
5+Amps Tis	sue Burning (fatal, vital organs destroyed)

ALWAYS PERFORM A HAZARD ASSESSMENT

The NFPA 70E Standard for Electrical Safety in the Workplace requires employers to perform an Electrical Arc Hazard Assessment. Each situation is *unique* and needs to be evaluated on its own merits. ASTM F1959 details the standardized test that must be used to determine the thermal protective value of textiles in an electric arc application.

Clothing selected for a particular application shall have an arc thermal performance value of (E_{BT} or ATPV) higher than the potential hazard to prevent the onset of 2nd degree burns.

ARC FLASH & GLOVE INFORMATIONAL VIDEOS ARE AVAILABLE. VISIT SALISBURYBYHONEYWELL.COM FOR MORE INFORMATION.

SALISBURY FR FABRICS

• Indura Ultra Soft® (register trademark of Westex) blend of 88% cotton and 12% high tenacity nylon substantially increase the fabric's abrasion resistance. Meets current NFPA 70E and ASTM F1506 standards.

•NOMEX® is a man made fiber resistant to heat, flame and chemicals. NOMEX® and KEVLAR® are registered trademarks of E.I. du Pont de Nemours and Company.

• Kevlar is a silky soft man-made fiber, Kevlar® is stronger than steel, combining great strength with great lightness.

• P84 is composed of aromatic backbone units only making it a recommended material for high temperature applications. P84® is a trademark of Inspec Fibres a Degussa company.

•Lenzing FR is a trademark of Lenzing AG. Lenzing FR® is a man-made cellulosic fiber made by Lenzing AG. It is permanently flame retardant treated in the fiber forming process.

• TuffWeld® (TUFFWELD® (60% Lenzing FR[™] - 40% Kevlar®).) TUFFWELD® offers inherent FR protection with a high level of comfort and durability. Exceptional lightweight comfort with superb wicking so you can stay cooler and drier even under demanding conditions. TuffWeld® is a registered trademark of Southern Mills, Inc.

SEF Modacrylic is the trademarked name for Solutia's line of modacrylic fibers.

	2	FR long-sleeve shirt and FR pants or FR coverall plus arc-rated face shield or switching hood (1 or 2)	8 cal/cm ²
	2*	FR long-sleeve shirt and FR pants or FR coverall plus switching hood (or faceshield with balaclava) (1 or 2)	8 cal/cm²
Royal Blue	3	FR long-sleeve shirt and FR pants and FR coverall and FR jacket and FR pants or total FR dothing system with hood (2	
Gray / Khaki	i 4	FR long-sleeve shirt and FR pants and FR coverall and FR jacket and FR pants or total FR dothing system with hood (2	or 3) 40 cal/cm²

SALISBURY INSULATED PRODUCTS (S.I.P.) - INSULATED HAND TOOLS

Every insulated hand tool is rated for exposure up to 1000VAC and dielectrically tested at 10,000VAC. These tools meet or exceed current ASTM F1505-07 and IEC 900 Standards for Insulated Hand Tools. These tools will help you to be compliant with OSHA 29 CFR 1910 Subpart S, and NFPA 70E.

TO FULLY COMPLY WITH OSHA 1910.333 (C)(2) AND NFPA 70E, Insulated hand tools must be used. A complete insulated tool program should be in place to meet these standards.

The insulating material used is impact resistant and flame retardant. Twocolor insulation makes inspection easier which adds to the overall safety. If the yellow under layer is showing, the tool may no longer be insulated properly and should be considered for electrical retesting.

Meets IEC 900 Standard for Insulated Hand Tools Exceed current ASTM F1505-07 Standards for Insulated Hand Tools Helps Meet OSHA Requirements Meets NFPA 70E Requirements Tested to 10,000 VAC and Rated for 1,000 VAC Maximum Exposure Impact Resistant & Flame Retardant Two-Color Insulating Material

SEE PAGE 97

12 CALICH

MADE IN U.S.A. OFFERING OVER 2,000 TOOLSI

WARNING: SALISBURY INSULATED TOOLS ARE TO BE USED AS SECONDARY PROTECTION AND ARE NOT INTENDED TO BE USED IN PLACE OF OTHER PERSONAL PROTECTIVE EQUIPMENT. WHENEVER POSSIBLE, ALWAYS DE-ENERGIZE LINES BEFORE WORKING ON OR AROUND THEM. ALTHOUGH THE INSULATION ON SALISBURY TOOLS IS IMPACT RESISTANT AND FLAME RETARDANT, EACH TOOL SHOULD BE INSPECTED PRIOR TO EACH USE FOR CRACKS, CUTS, OR OTHER DAMAGE. SHOULD THE YELLOW INSULATION BECOME VISIBLE THROUGH THE ORANGE OUTER LAYER, DISCONTINUE USE IMMEDIATELY

	IN A PLASTIC BOX, INCLUDING TOOL ROLLS

► 1000V ELECTRICAL INSULATED TOOL KIT FOR HYBRID VEHICLES

Are you ready? Do you have the necessary tools to guard against the dangers of electrocution from hybrid-electric vehicles?

Mechanics and firefighters should be cautious when working on hybrid vehicles because hybrid vehicles use a combination of a gasoline motor and a high-voltage electric motor. The electric motor operates on voltages as high as 500 volts, that's more than eight times the lethal voltage. Be ready for anything. Don't be caught worrying about the "what ifs" while working on these vehicles.

► 1000V UTILITY INSULATED HAND TOOL KITS

Salisbury makes working in the field even easier with these three Utility Tool Kits.

Salisbury now offers three specially designed Utility Insulated Hand Tool Kits. These convenient tool kits include everything you need for routine utility applications. Salisbury is proud to offer a 24 piece Substation Tool Kit, a 16 piece Meter Tool Kit, and a 15 piece Lineman's Secondary Distribution Tool Kit. Each kit includes easy storage tool rolls and lightweight tool box.

Cat. No.	Description
TK12HB	Hybrid Tool Kit; 12 Pcs. Includes: 10" Crimping Tool, 9" Side Cutter, 8" Slip Joint
	Cutter, 6" Chain Nose Pliers, 6" Diagonal, 10" Water Pump, Screwdrivers: #1 X 4,

NON-SPARKING & NON-MAGNETIC SAFETY TOOLS

NON-SPARKING & NON-MAGNETIC SAFETY TOOLS

Salisbury by Honeywell is proud to introduce the New Non-Sparking/Non-Magnetic Insulated Hand Tools and Tool Kits. This new introduction to the Salisbury Insulated Products (S.I.P.) Insulated Hand Tool line are manufactured from special Aluminum-Bronze and Copper-Beryllium alloys for safe use in areas where hazardous, flammable, or combustible vapors, liquids, dusts, or residues may be present. These tools are also highly corrosion-resistant.

Aluminum Bronze and Copper Beryllium Non-Sparking Safety Tools are specifically designed to eliminate the risk of sparks at sites where explosive atmospheres may be present.

Our safety tools are drop forged for the highest quality in hand tools. These corrosion-resistant tools are suitable for use in ship yards, laboratories, and paper and pulp mills, as well as in the pharmaceutical, food product manufacturing and wine industries.

Every Non-Sparking/Non-Magnetic double insulated hand tool is rated for exposure up to 1000 VAC and dielectrically tested at 10,000 VAC. These tools meet or exceed ASTM 1505-07 and IEC 900 standards for Insulated Hand Tools. These tools are necessary for compliance with OSHA 1910.333 (c)(2) and NFPA. These tools also meet CSA-2462 standards.

INDUSTRIES REQUIRING HAND TOOLS WITH NON-SPARKING PROPERTIES

- MANUFACTURING INDUSTRIES:
- Alcohol Industries
- Ammunition. Missile & Explosives Plants
- Automotive Plants
- · Breweries & Distilleries
- Chemical Manufacturina
- · Flammable Materials Manufacturing
- Flour Mills
- · Furniture Manufacturers (Varnish and Painting)
- · Gas Plants
- · Glue Factories
- · Ink Industries
- · Liquified Petroleum Gases (LPG)
- · Mining
- Nuclear Products
- · Oil & Natural Gas Drilling, Refining & Handling
- · Paint, Lacquer & Varnish Products
- · Paper and Pulp Mills
- · Petrochemicals
- · Petroleum Refining
- Pharmaceutical Industries
- Pipeline Construction & Maintenance
- Plastic Manufacturing
- Sugar Mills
- Synthetic Fiber Manufacturing
- · Wine Industries

TRANSPORTATION INDUSTRIES:

- · Airports
- Railroads
- · Shipyards
- Tankers
- Tanker Trucks
- Vessels
- Workboats

GOVERNMENT AGENCIES: · Aircraft & Missile Plants

- · Airport (Refueling & Maintenance Operations)
- · Armed Forces
- Chemical, Biological, Radiological, Nuclear or Explosives Logistical Support Operational Equipment
- · Fire Departments, Military Bases
- · First Responders to Weapons of Mass Destruction, Firefighters, Public Safety Bomb Squads & Local Rescue Squads
- · Hazardous Materials Handling & Clean-up
- · Munitions Depots
- Nuclear Production & Waste
- · Public Utilities: Gas, Electric & Telecommunication
- Waste Management
- · Water Treatment Facilities

OTHER INDUSTRIES:

- Cleaning & Spraying Operations
- · Confined Space Maintenance
- · Explosive & Pyrotechnics
- Geophysical Exploration
- · Grain Storage & Handling
- Hazardous Material Handling
- · Maintenance & Service Operations
- · Paint Spraying, Finishing & Booth Operations
- Packing Plants
- · Propane Distributors & Bulk Plants
- Warehousing of all Hazardous Materials

OFFERING A FULL LINE OF TOOLS & TOOL KITS:

Cutters

Socket Wrenches

- Box End Wrenches • Pliers •
- **Open End Wrenches**
- Hex Wrenches
- Ratcheting Wrenches
- Screwdrivers

These tools utilize the same highly impact resistant insulating material as our established full line of insulated hand tools. The insulating material used is flame retardant and created with two-colors, making inspection easier, adding to the overall safety. If the yellow under layer is showing, the tool may no longer be insulated properly and should be considered for replacement and shall be removed from service.

Appropriate applications include industries where non-sparking safety tools are required. The non-magnetic feature of these alloys also make them ideal for working on special machinery with powerful magnets such as MRI machines, military de-mining and explosives.

SPECIFICALLY DESIGNED TO ELIMINATE THE RISK OF DANGEROUS SPARKS.

INDUSTRIES REQUIRING HAND TOOLS WITH NON-MAGNETIC PROPERTIES

- Aircraft Maintenance & Overhaul
- Aluminum & Other Metal Smelting
- Electronics Manufacturers
- Hospitals & Clinics Magnetic Resonance Imaging (MRI)
- MRI Maintenance
- · Mine Sweepers
- Nuclear Products & Testing Machines
- Precision Magnetic Equipment
- · Public Utilities: Gas, Electric & Telephone
- Radar Transmission Centers

INDUSTRIES REQUIRING HAND TOOLS WITH **CORROSION-RESISTANT PROPERTIES**

- · Boat Owners
- Chemical Manufacturing
- · Desalinization Plants
- · Food Product Manufacturing
- · Laboratories
- · Paper & Pulp Mills
- · Petrochemicals
- · Pharmaceutical Industry
- Plastic Manufacturing
- · Shipvards
- · Tankers, Vessels & Other Work Boats
- Wine Industry

	EXTENSION, REGULAR SOCKETS 6PT : 3/8",7/16", 1/2", 9/16", 5/8",
	11/16", 3/4", 13/16", 7/8", 15/16", 1", 1 1/16", 1 1/8", 1 3/16",
	1 1/4", 1 5/16", 1 3/8", 1 7/16", 1 1/2" PACKAGED IN A PLASTIC
	TOOL BOX. THIS SET IS DESIGNED FOR USE IN TIGHT WORK SPACE.

IMPORTANT SAFETY INFORMATION FOR PPE

ARC PROTECTION CLOTHING REQUIREMENTS

OSHA 29 CFR 1910.269 (l)(6)(iii) "The employer shall ensure that each employee who is exposed to the hazards of flames or electric arcs does not wear clothing that, when exposed to flames or electric arcs, could increase the extent of injury that would be sustained by the employee."

Clothing made from acetate, nylon, polyester, acrylic, polyethylene and rayon, in either pure or blended forms, should not be worn when working in hazardous environments.

Clothing made from 100% cotton or wool must be determined acceptable for the conditions the worker will be exposed to. Clothing made from flame-resistant materials, that meet current ASTM F1506, is acceptable.

ASTM F1506 details the specifications of a textile to be used by an electrical worker as a means of electrical arc protection. A garment must include a label, which states the following information: Tracking I.D. Code, Meets ASTM F1506, Manufacturer's name, Care Instructions & Fiber Content, Size, and "Arc Rating" - ATPV or E_{BT} .

ASTM F2178 is the test method used to measure arc rated products intended to protect the face of workers exposed to electrical arcs.

DANGERS OF ARC FLASH

Even relatively low voltages can be fatal. For example, electrical shocks produced from common 60 hz AC power passing from hand to foot for a duration of one second can have the following effects:

EFFECTS OF ELECTRICAL SHOCK

Current	Effects
1-3Milliamps	Tingling Sensation
3+Milliamps	Shock (pain)
10+Milliamps	Muscular Contractions (can't let go)
30+Milliamps	Respiratory Paralysis (may be fatal)
60+Milliamps	Ventricular Fibrillation (usually fatal)
4+Amps	Heart Paralysis (fatal)
5+Amps Tis	sue Burning (fatal, vital organs destroyed)

ALWAYS PERFORM A HAZARD ASSESSMENT

The NFPA 70E Standard for Electrical Safety in the Workplace requires employers to perform an Electrical Arc Hazard Assessment. Each situation is *unique* and needs to be evaluated on its own merits. ASTM F1959 details the standardized test that must be used to determine the thermal protective value of textiles in an electric arc application.

Clothing selected for a particular application shall have an arc thermal performance value of (E_{BT} or ATPV) higher than the potential hazard to prevent the onset of 2nd degree burns.

ARC FLASH & GLOVE INFORMATIONAL VIDEOS ARE AVAILABLE. VISIT SALISBURYBYHONEYWELL.COM FOR MORE INFORMATION.

SALISBURY FR FABRICS

Indura Ultra Soft® (register trademark of Westex) blend of 88% cotton and 12% high tenacity nylon substantially increase the fabric's abrasion resistance. Meets current NFPA 70E and ASTM F1506 standards.

• NOMEX® is a man made fiber resistant to heat, flame and chemicals. NOMEX® and KEVLAR® are registered trademarks of E.I. du Pont de Nemours and Company.

Kevlar is a silky soft man-made fiber, Kevlar® is stronger than steel, combining great strength with great lightness.

• P84 is composed of aromatic backbone units only making it a recommended material for high temperature applications. P84® is a trademark of Inspec Fibres a Degussa company.

• Lenzing FR is a trademark of Lenzing AG. Lenzing FR® is a man-made cellulosic fiber made by Lenzing AG. It is permanently flame retardant treated in the fiber forming process.

• TuffWeld® (TUFFWELD® (60% Lenzing FR[™] - 40% Kevlar®).) TUFFWELD® offers inherent FR protection with a high level of comfort and durability. Exceptional lightweight comfort with superb wicking so you can stay cooler and drier even under demanding conditions. TuffWeld® is a registered trademark of Southern Mills, Inc.

• SEF Modacrylic is the trademarked name for Solutia's line of modacrylic fibers.

SALISBURY PRO-WEAR Color Code	Hazar Risk Cate (HRC	gory (Typical Number of clothing layers given in parentheses)	Minimum Arc Thermal Performance Exposure Value (ATPV) Rating of PPE
Navy Blue	1	FR long-sleeve shirt and FR pants or FR coverall plus arc-rated face shield or switching hood (1)	4 cal/cm ²
· ·	2	FR long-sleeve shirt and FR pants or FR coverall plus arc-rated face shield or switching hood (1 or 2)	8 cal/cm ²
	2*	FR long-sleeve shirt and FR pants or FR coverall plus switching hood (or faceshield with balaclava) (1 or 2	2) 8 cal/cm²
Royal Blue	3	FR long-sleeve shirt and FR pants and FR coverall and FR jacket and FR pants or total FR dothing system with hood (
Gray / Khaki		FR long-sleeve shirt and FR pants and FR coverall and FR jacket and FR pants or total FR clothing system with hood (

DEFINITIONS

Arc Flash: An arcing fault is the flow of current through the air between phase conductors or phase conductors and neutral or ground. An arcing fault can release tremendous amounts of concentrated radiant energy at the point of the arcing in a small fraction of a second resulting in extremely high temperatures, a tremendous pressure blast, and shrapnel hurling at high velocity.

ASTM: American Society for Testing and Materials

Arc Thermal Performance Value (ATPV): This value is presented in calories per square centimeter and represents the maximum capability for arc flash protection of a particular garment. This rating also applies to fabrics, however, a garment made from more than one layer of arc flash rated fabric will have a calorie per square centimeter rating greater than the sum of the ATPV ratings of the original fabrics. The calories per square centimeter rating of most arc flash protection suits, coveralls, and coats is commonly sewn into the fabric in large letters on the outside of the garment.

Calories per Centimeter Squared (cal/cm²): This is a number identifying the amount of energy that can be delivered to a point at a particular distance from an arc flash. Once this value is known, the ATPV rating of the flash clothing required for work at that distance from the potential flash hazard is also known. See ATPV.

Calorie: A calorie is the energy required to raise one gram of water one degree Celsius at one atmosphere. The onset of second-degree burns may occur at 1.2 calories per centimeter squared per second. One calorie per centimeter squared per second can be equal to holding your finger over the tip of the flame of a cigarette lighter for one second.

De-energized: Free from any electrical connection to a source of potential difference and from electrical charge; not having a potential different from that of the earth.

Electrical Hazard: A dangerous condition such that contact or equipment failure can result in electric shock, arc flash burn, thermal burn, or blast.

Electrical Safety: Recognizing hazards associated with the use of electrical energy and taking precautions so that hazards do not cause injury or death.

Electrically Safe Work Condition: A state in which the conductor or circuit part to be worked on or near has been disconnected from energized parts, locked/tagged in accordance with established standards, tested to ensure the absence of voltage, and grounded if determined necessary.

Energy Breakopen Threshold (EBT): Primarily, this addresses the physical strength of the fabric with respect to thermal energy and at what arcflash value the fabric will fail.

Flame-Resistant (FR): The property of a material whereby combustion is prevented, terminated, or inhibited following the application of a flaming or non-flaming source of ignition, with or without subsequent removal of the ignition source.

Flash Hazard: A dangerous condition associated with the release of energy caused by an electric arc.

Flash Hazard Analysis: A study investigating a worker's potential exposure to arc-flash energy, conducted for the purpose of injury prevention, the determination of safe work practices, and the appropriate levels of PPE.

Flash Protection Boundary: An approach limit at a distance from exposed live parts within which a person could receive a second degree burn if an electrical arc flash were to occur.

Flash Suit: A complete FR clothing and equipment system that covers the entire body, except for the hands and feet. This includes pants, jacket, and bee-keeper-type hood fitted with a face shield.

Hazard Risk Category (HRC): Categories defined by NFPA 70E to explain protection levels needed when performing tasks. The values range from -1 to 4. ATPV rated PPE is required for categories 1 through 4 as follows:

Category 1: 4 cal/cm² · Category 2: 8 cal/cm² · Category 3: 25 cal/cm² · Category 4: 40 cal/cm²

IEEE: The Institute of Electronics and Electrical Engineers (IEEE) (Note: IEEE1 584 – 2002 Guide to Performing Arc-Flash Hazard Calculations).

Incident Energy: The amount of energy impressed on a surface, a certain distance from the source, generated during an electrical arc event. One of the units used to measure incident energy is calories per centimeter squared (cal/cm2).

Limited Approach Boundary: An approach limit at a distance from an exposed live part within which a shock hazard exists.

NEC The National Electrical Code: The NFPA Standard 70-2005 "The National Electrical Code" (NEC) (Note: paragraph 110.16 contains requirements for warning labels).

NFPA: The National Fire Protection Association.

NFPA 7OE Standard: Standard that provides guidance on implementing appropriate work practices that are required to safeguard workers from injury while working on or near exposed electrical conductors or circuit parts that could become energized.

OSHA: Occupational Safety and Health Administration.

OSHA 29 CFR 1910, Subpart S-Electrical: Occupational Safety and Health Standards. Section 1910 Subpart S-Electrical Standard number 1910.333 specifically addresses Standards for Work Practices.

Prohibited Approach Boundary: An approach limit at a distance from an exposed live part within which work is considered the same as making contact with the live part.

Restricted Approach Boundary: An approach limit at a distance from an exposed live part within which there is an increased risk of shock, due to electrical arc over combined with inadvertent movement, for personnel working in close proximity to the live part.

Shock Hazard: A dangerous electrical condition associated with the possible release of energy caused by contact or approach to energized parts.

Voltage, Nominal: A nominal value assigned to a circuit or system for the purpose of conveniently designating its voltage class. The actual voltage at which a circuit operates can vary from the nominal within a range that permits satisfactory operation of equipment.

Working Near (live parts): Any activity inside a limited approach boundary.

Working On (live parts): Coming in contact with live parts with the hands, feet, or other body parts, with tools, probes, or with test equipment, regardless of the personal protective equipment a person is wearing.
