

HAZMASTERS

CREATING SAFER WORK ENVIRONMENTS
A SUBSIDIARY OF WESCO DISTRIBUTION CANADA

KEEPING PEOPLE SAFE AT WORK IS OUR PASSION

We Are Creators Of Safer Work Environments

Our approach to your safety program and training is about more than the products - it's about how we can support you in creating safer work environments and building a safety culture.

Get to know our experienced team

Our staff is experienced and highly trained, with current knowledge on provincial safety regulations.

We are on-site with you, where you need us - gaining insight into your workplace, **focusing on the details**, to provide complete safety solutions.

We understand technical safety products, as well as the basics you need from day to day. Our team will assist in product selection and supply, and advise immediately of any manufacturer recalls or safety alerts on any products we have supplied.

Comprehensive safety training, when and where you need it

Training is an important part of safe work environments, making sure your staff have the skills to do their part for safety, whether it's safety education, certificate courses, product orientation, etc.

We can bring our safety training to you or conduct it in our branches.

A strong foundation in health and safety

Providing safety products and training with exceptional service since 1989, we remain focused on sharing our safety expertise through service and education in a wide range of markets.

We offer service branches across Canada. Every branch offers extensive safety product inventories, functioning service centres, and education classrooms to quickly respond to your safety needs.

Services

As important as safety is to your business, it is also important to manage it effectively to maintain high productivity. Hazmasters offers an integrated set of workplace safety solutions to ensure both maximum safety and efficiency.

Training courses: Our safety training courses can be customized for specific requirements; we also offer open enrollment and private classes on many safety topics, as well as IICRC training.

HazSafeID: Product inspections to help ensure regulatory compliance and legal due diligence.

- Inspection (we do the inspections)
- Identification
- Tracking
- Hi-visibility tagging (RFID chips optional)
- Reporting
- 24/7 web access

Delivery services: Hazmasters fleet delivers safety products to your facility and/or job site; majority of orders are delivered within 24 hours, **with 24/7 emergency support.**

Product orientation: Right from the start, we make sure you and your workers are trained in the correct use of your safety products.

Repair & maintenance centres: Our convenient locations can repair and maintain gas detection equipment, fall protection equipment, HEPA filtered equipment, drying equipment, and respiratory equipment.

Respiratory fit testing: Quantitative and qualitative assessment to make sure your workers have the right fit for respiratory equipment.

Product & equipment rentals & leasing: Rentals are available for products including (but not limited to) fall protection, respiratory, gas detection, ventilation, HEPA filtered equipment, and drying equipment. Daily, weekly, monthly and multi-unit rental rates available.

Equipment calibration: Trained technicians perform scheduled calibrations to ensure optimal performance, compliance, and long life for your safety equipment.

DOP/PAO Testing of HEPA filtered equipment: Available both on-site and within our facilities. Safety is more than equipment. DOP service includes comprehensive insurance coverage to protect you.

Re-Certification: Stay safe by ensuring all of your equipment is certified and up to par for doing its job and for keeping your workers safe.
