

- Single source provider for safety products, training and services
- Service centers at each branch for all your equipment maintenance, repair and calibration needs
- Respiratory fit testing and DOP/PAO testing of HEPA filtered equipment, performed at our facility or at your job site
- On-site consultations for your unique needs
- Training available both in our state-of-the-art facilities on at your job site
- 24/7 emergency support
- Highly trained, knowledgeable staff, committed to supporting you in building a better safety culture

Hazmasters is committed to training, education, and full-service solutions to help companies build a strong safety culture, focused on managing risks and improving efficiencies, saving time and resources. We are a company that not only supplies the product, but also inspects, tests and services it. A company that educates and trains. A company that delivers every aspect of workplace safety to the employer, and follows up to make those solutions easy to implement and sustain.

A part of WESCO Distribution, we leverage our breadth of service and product expertise to offer customers application specific solutions.

We have expanded our national footprint while continuing to service markets such as Manufacturing, Mining, Construction, Healthcare, Utilities, Electrical, Oil & Refineries, Agriculture, Restoration, Abatement, and much more. This further evolution has allowed Hazmasters to service their customers better than ever, adding more training options and a more diverse range of products and services.

Hazmasters continues to be a leading distributor of safety products servicing customers in the industrial, construction, commercial, institution, and government markets.

We take great pride in providing our customers with the right solution to their health, safety and personal protective equipment requirements. We take greater pride in working with responsible employers that take great action to keep their employees safe – each and every day.

EQUIPMENT SERVICE, MAINTENANCE & REPAIR

Technical services, available in-house and on-site, to reduce down time and greatly enhance your productivity

Why choose Hazmasters for your service requirements?

COMPLIANCE

Minimize risk and liability by meeting provincial and federal regulations along with internal codes of practice.

CONVENIENCE

Services are available at your site or by pick up and delivery by our fleet. We service what we sell.

COST SAVINGS

Reduce downtime, protect your assets and increase productivity by having our trained technicians service your equipment.

Hazmasters is a full service solutions provider.

- As important as safety is to your business, it is also important to manage it effectively
- Hazmasters offers an integrated set of workplace safety solutions to ensure both maximum safety and efficiency
- Have confidence knowing Hazmasters can provide all the necessary services to go along with the equipment that we sell, making us a comprehensive and convenient one-stop-shop
- Our technicians are factory trained and certified

Maintenance, Repair, Calibration and Recertification

- Ensure optimal performance and long lasting equipment
- Gas detection calibration, sensor replacement and instrument repair
- Self retracting lifeline recertification, inspection and repair
- Fall protection equipment maintenance; harness fittings
- Dehumidifiers, blowers, negative air machines, HEPA vacuums and hydroxyl/ozone generators trouble shooting and service
- Respiratory equipment service and cleaning
- Level A chemical protective suit pressure testing
- Portable lighting repair
- Ladder inspection

DOP/PAO Testing of HEPA Filtered Equipment

- We have a comprehensive DOP Technician Certification Program that ensures testing is completed professionally, safely and in accordance with applicable regulations
- Our programs and operations adhere to 6S principles and insurance is in place to cover all facets of the services Hazmasters provides

What is a DOP/PAO test? A process that challenges HEPA filtered equipment to ensure it is safe to use in hazardous environments. An aerosol generator is used to convert DOP or PAO oil to an aerosol with particle sizes down to .3 micron. A photometer then measures the amount of particulates in the exhaust air stream.

EQUIPMENT SERVICE, MAINTENANCE & REPAIR

Technical services, available in-house and on-site, to reduce down time and greatly enhance your productivity

Respiratory Fit Testing

- Qualitative and quantitative fit tests for respiratory protection are available at our location or at your job site
- For optimal protection, a respirator must fit properly and form a good seal on your face when in use; this is verified through a proper fit test
- Upon successful test completion, fit test record cards are provided listing respirator model and worker identification
- All testing is done in compliance with CSA Standard Z94.4-11

Equipment Rentals and Leasing

- Rentals and leasing are ideal for addressing budget constraints and short term emergency solutions
- Rental fleets include confined space entry equipment, fall protection equipment, gas detection instruments, tools and measurement instruments, respiratory and ventilation equipment, thermal imaging cameras, HEPA vacuums, drying equipment and air movers/scrubbers
- Need something else? Ask us!
- Daily, weekly and monthly rates are available

**Availability of services and rental fleet may vary by branch.*

COMPREHENSIVE TRAINING PROGRAMS

Education and skills training focused on real life scenarios to help create safer work environments

Building a safety culture through our commitment to education and training

INSPECTION SERVICES

Fully integrated safety asset inspection management system, building a stronger safety culture

Taking regulatory compliance and workplace safety to a higher level!

We inspect and document your equipment, saving you time and money.

Damaged, unsafe equipment is identified by our inspectors and removed from service so workers don't get injured due to wearing faulty equipment.

Why use the HazmastersID inspection program?

COMPLIANCE

Ensure regulatory compliance and legal due diligence when you have us manage your inspections.

EFFICIENCY

Inspection results are documented in our web-based system; reports are available to you 24/7

PRODUCTIVITY

Track equipment within a facility, job site and organization; assign equipment to a specific worker

ENHANCED INSPECTIONS

- Free up your safety officers' valuable time
- Third party inspections are recommended by manufacturers
- Our inspectors are factory trained and certified competent
- Inspections are completed based on manufacturer recommendations
- New equipment is inspected and tagged prior to purchase
- Inspections performed on-site or at our facility

DETAILED DOCUMENTATION

- Detailed and accurate records available online for all inspected assets, including failed items and items needing service
- Updated reports including equipment assignment by job site and individual worker
- Inspection renewal notification to ensure proactive monitoring
- Look for patterns that indicate an alternative product may be more suitable

VISUAL CONTROL

- Improved monitoring and identification via the high-visibility tag
- Annual colour coded tagging system for ease of tracking and monitoring
- Easily identify compliance or quality control issues at a distance
- Tags are imprinted with the year and month of inspection and a unique reference number
- Failed items identified with an orange "DANGER DO NOT USE" tag

CREATING SAFER WORK ENVIRONMENTS

A SUBSIDIARY OF WESCO DISTRIBUTION CANADA

PRODUCT SELECTION

Our product selection is as diverse as the markets we service. Our experienced, knowledgeable team will find the best solution to meet your needs.

Air Movement & Cleaning

- Air Filters
- Air Movers & Blowers
- Air Sampling
- Air Scrubbers & Negative Air Machines
- Drying Equipment & Tools
- Odour Control Equipment

Chemicals, Cleaners & Coatings

- Binding Compounds
- Cleaners & Degreasers
- Coatings & Encapsulants
- Disinfectants
- Fog & Water Repellants
- Mastic & Coating Removers
- Odour Control
- Paint Removers & Strippers

Environmental Safety

- Containment & Disposal
- Decon/Emergency Showers
- Emergency Eyewash
- Enclosure Systems
- Spill Control

Facilities Management

- Facility Maintenance
- Flags & Markers
- Information Management
- Site Security
- Traffic Cones & Barricades

Fall Protection & Rescue

- Anchors
- Body Belts
- Climbing & Positioning Devices
- Connectors & Decelerators
- Debris & Personnel Netting
- Harnesses
- Kits & Accessories
- Mobile Fall Protection Systems
- Railings & Barriers
- Tool & Equipment Tethering
- Tripods, Davits & Rescue Systems

Fire Safety

First Aid

- Decon/Emergency Showers
- Emergency Eyewash
- First Aid/Emergency Kits & Supplies
- Personal Identification & Rescue Alarms

Gas Detection & Monitoring

- Area Monitoring Systems
- Kits & Accessories
- Multi Gas Detectors
- Single Gas Detectors
- Testing & Calibration

Hardware & Tools

- Debris & Personnel Netting
- Ladders & Platforms
- Lighting & Electrical
- Lockout/Tagout
- Tapes & Adhesives
- Tools & Accessories

Machines & Equipment

- Drying Equipment & Tools
- Equipment Identification
- Sprayers & Foggers
- Vacuums
- Warming Blankets & Wraps

Marine Safety & Rescue

Personal Protective Equipment

- Clothing & Accessories
- Ergonomics
- Eye & Face Protection
- Footwear & Accessories
- Hand Protection
- Head Protection & Accessories
- Hearing Protection
- Respiratory Protection
- Skin Care
