SCREENING

Seek Scan Thermal Imaging System

• Seek Scan™ is a simple, low-cost, thermal imaging system designed to automate body temperature screening using skin temperature as a proxy

• Unlike traditional screening methods, Seek Scan enables social distancing, self-measurement and finds the most reliable spot on the face for temperature measurement

FLIR Extech IR200: Non-Contact Forehead IR Thermometer

• Ideal for quickly detecting elevated body temperature

• Non-contact design eliminates need for replacement probe covers and other supplies
